Living Language: Science and Society
APSC 402 | ASTU 402 | FRST 402 | LFS 402 | LLED 402 | PHAR 402

An interdisciplinary course open to all UBC undergraduates

Winter 2021 (September – December 2021)
TBC

What is Living Language: Science and Society?
It is a three-credit course, and the first ever University-wide course in Language Sciences – the scientific study of language as it applies to all domains of human life, in the creation and acquisition of spoken language through writing systems, texts of all kinds, arts, culture, science, and technology. Living Language is cross-listed in six faculties as APSC 402, ASTU 402, FRST 402, LFS 402, LLED 402, and PHAR 402. Enrolment for this course will be limited to 40 students.

Who is it for?
The course is designed for upper-level undergraduate students in any discipline and from any Faculty who are interested to learn more about how language works, what it does, and why learning this will give you a deeper understanding of not only your other courses, but also help prepare you for the various directions you might go after UBC. There are no pre-requirement, other than a commitment to deep intellectual exploration, a willingness to be challenged, and a readiness to reflect on what you have learned in your discipline through the lens of language.

What will you be doing?
Living Language is an interdisciplinary course in which students—individually and in groups—will examine, integrate and apply their subject-specific knowledge using the framework of the language sciences, with a focus on topics of real-world importance. In the course of the term, you will complete short written assignments that include individual reflections and longer, more in-depth, explorations. Working in small interdisciplinary groups, you will design an action-oriented final project to be presented in-class at the end of the term.

Who is teaching it?
Living Language will be co-taught by Assistant Professors Elise Stickles from English Language and Literatures and Darko Odic from Psychology. Stimulating guest lectures from language leaders across campus and the wider community will expose you to a range of perspectives and will help illustrate the central role of language in everything we do.

“The course was nothing like any other course I'd taken before – collaborative in nature, interesting, inspiring, and engaging. The fact that major assignments were open to creative interpretation made things wonderful.”

- Feedback from Student Evaluation of Teaching, 2018W

Which course code should I register in?
Depending on your situation and program, you may choose to register for the course in your home Faculty or through another Faculty. The course can be counted as an unrestricted elective for all UBC undergraduate programs and for specific program requirements as outlined below.

**APSC 402**  
Eligible to be counted as a Humanities and Social Sciences elective for B.A.Sc. programs

**ASTU 402**  
Eligible to be counted as an elective, and for upper-level and outside credit requirements for B.A. and B.F.A. programs

**FRST 402**  
Eligible to be counted as a Forestry elective for B.Sc. in Forest Sciences program

**LFS 402**  
Eligible to be counted as a restricted elective for B.Sc. in FNH, Nutritional Sciences Major

**LLED 402**  
Eligible to be counted as an elective for Diploma in Literacy Education  
Eligible to be counted as an elective for Diploma in Teaching English as a Second Language

**PHAR 402**  
Eligible to be counted as an elective for Entry-to-Practice PharmD program

**My Faculty doesn’t cross-list the course. Can I still register?**  
Yes! Students from the Faculty of Science and the Vancouver School of Economics are encouraged to register in ASTU 402 to meet their programs’ elective and Arts credit requirements. Students from Sauder School of Business can register in any course code to meet their non-Commerce elective requirement.

**More questions about registration?**  
Please consult with your Faculty or departmental Advisor to choose the appropriate registration option for you.
